Education

DIGITAL CAMPUS Paris | Digital concept designer (web development major)   2019 - 2022 graduate

- Gained considerable skills in front-end development (HTML/CSS, Sass, Javascript). Developed knowledge in responsive design using the mobile-first approach (media queries, bootstrap, CSS grid). Designed and developed user-friendly websites.
- Engaged in group projects and hackathons through which we used GitHub for collaborative work, Slack or Discord for group communication.
- Acquired skills in back-end development (PHP/ my SQL), contact forms, login systems, and security.
- Learned about optimisation using tools such as google lighthouse to improve a website's performance and SEO.
- Discovered and implemented the concept of eco-conception in programming. We used online platforms such as websitecarbon.com to measure the carbon footprint of websites and make adjustments resulting in a more eco-friendly design and performance.
- Programmed e-commerce websites and blogs with the use of WordPress and its various plug-ins
- Made use of various debugging tools such as Chrome DevTools, Firefox Javascript debugger, VS code debugger and its extensions.
- Acquired basic UX/UI fundamentals, wireframing and prototyping using Figma

SKEMA Business School | Global management (marketing major)   2016 - 2018

- Studied marketing, project management, accounting
- Implemented multiple business plans
- Learned fundamental accounting skills
- Developed marketing skills and implemented them in various projects
